

AVATAR PAN-TILT ZOOM CAMERA (PTZ) ACCESSORY

BRAND: ROBOTEX INC

The Pan-Tilt-Zoom (PTZ) Camera is a 360° color IR camera that allows the operator to survey an area and zoom in (up to 100x) on objects of interest. A protective roll bar keeps the camera's dome from getting scratched. The split screen function on the robot controller allows for monitoring two different directions at the same time, one with the robot's drive camera and another with the PTZ.
