

BS-5 CAPTURE SHIELD

BRAND: PAULSON

The BS-5 capture shield is a polycarbonate hand held body shield with ergonomic and protective features and is specifically designed for use in cell extraction. Measuring 20" x 36" and .250" thick, the shield itself has a superior optical quality and workmanship that provides excellent impact, splash, and fragments protection.

The strong double handles allow a firm grip and is uniquely designed to allow 2 people to grip with both hands on each handle in case extra holding power is needed. Additionally, the foam pad on the concave surface is designed to provide extra holding friction. Each handle is dielectric to prevent electrical pass through.
