

LIBERATOR II TACTICAL AERIAL HEADSET SYSTEM

BRAND: TCI

The TCI Liberator II Aerial Platform Headset was created in collaboration with one of the top SWAT teams in the United States for use during aerial platform work. Featuring an A9 Advanced General Aviation Microphone to reduce wind noise and built on the proven Liberator II Platform, this unit is designed to plug directly into the helicopter's communication system while also providing active hearing protection. The TCI Aerial Platform Headset can be worn comfortably with a ballistic helmet and can be configured to work with each agency's aerial platform systems.
