

LOW ROLL DISTRACTION DEVICE - TRAINING FUZE

BRAND: DEFENSE TECHNOLOGY

The Defense Technology® Low Roll™ Training Body uses a hex cut end cap design to reduce the roll effect when deployed. It replicates the Low Roll™ Distraction Device® body to improve training. In order to easily distinguish from operational devices, the body is powder coated military training blue.

Will only accept the 1697 series of training fuses. The use of eye, hearing and glove protection is strongly encouraged. When deploying, do not block the end caps.
