

LOW ROLL: DISTRACTION DEVICE TRAINING RELOADABLE BODY

BRAND: DEFENSE TECHNOLOGY

The Model 8933T Low Roll™ Distraction Device® Reloadable Training Body intended to act as a training replica of the Low Roll™ Distraction Device® body. In order to reduce the roll effect when deployed, the body features a hex cut end cap design. It is powder coated military training blue to easily distinguish it from operational devices and has an unlimited life-cycle of use. This body only accepts the 1697 series of training fuzes. The use of eye, hearing and glove protection is strongly encouraged. When deploying, do not block the end caps.
