

X26E CONTROLLED DIGITAL POWER MAGAZINE (CDPM)

BRAND: TASER INTERNATIONAL

The Controlled Digital Power Magazine (CDPM) features 195 5-second firings when at room temperature. It is able to assist with consistent power by incorporating lithium power cells and an onboard memory chip to keep record of the remaining power level. The CDPM memory keeps information of the energy cell performance and life expectancy of the energy cell pack. The CDPM adds disconnect/deactivate safety feature to the X26E.

Designed for use with the X26E.
